EXHIBIT 5

```
1
 1
              IN THE UNITED STATES DISTRICT COURT
               FOR THE NORTHERN DISTRICT OF OHIO
 2
 3
      Z.H., by and through KEVIN
      HUTCHENS and CHRISTIN
 4
      HUTCHENS, individually,
      and as parents and next
      friends of Z.H.,
 5
 6
                Plaintiffs, Case No. 1:14-cv-00176-CAB
 7
          vs.
 8
      ABBOTT LABORATORIES, INC.,
 9
                Defendant.
       10
11
                         DEPOSITION OF
12
               GODFREY P. OAKLEY, JR., M.D., MSPM
13
                         March 11, 2016
14
15
                           8:55 a.m.
16
17
                1201 West Peachtree Street, N.W.
                          14th Floor
18
                        Atlanta, Georgia
19
20
                  Kara Barger, CCR No. B-1496

```

```
8
 1
           Α.
                 Yes.
                 -- prior to your last trial testimony?
 2
           Q.
 3
           Α.
                 Yes.
                 Okay. Thanks.
 4
           Ο.
                 I usually keep them in my pocket.
 5
           Α.
           O.
                 And let me ask you this.
 6
 7
                 Since you submitted your report in this
 8
      case, in the Hutchens case, have you reviewed any
      additional information other than what's reflected in
 9
10
      your report for this case related to Depakote?
                 Other than this paper I gave you this
11
12
      morning, I mean I reviewed that. Then I reviewed the
13
      citations that I had for, you know, my report.
14
           Ο.
                Okay. You say the paper that you gave
15
      me --
                Well --
16
           Α.
17
           Ο.
                 -- this morning?
                 -- this table. I'm sorry.
18
           Α.
19
           Q.
                 All right.
20
                 (Defendant's Exhibit 3 was marked for
           identification.)
21
                 (By Mr. Marshall) So, Doctor, I'm showing
22
23
      you what's been marked as Exhibit 3.
24
                 Can you identify what that is, please?
                 This is a copy of a table, 1.1, from
25
           Α.
```

```
9
 1
      Dr. Holmes's textbook or book at least entitled
      Congenital -- Common Malformations, Dr. Lewis Holmes,
 2
 3
      published by Oxford in 2011. This is a table that
      lists recognized human teratogens in 2009.
 4
                 And what is the significance of Exhibit 3
 5
      to your opinions in this case?
 6
 7
                 Well, it's a list of the known human
           Α.
 8
      teratogens; and it's a rather finite list. And it's
      got Accutane. It's got thalidomide and has valproic
 9
10
      acid on it. And those have been parts of things I've
      discussed before.
11
12
           Q.
                 Okay. Is there anything about Exhibit 3
13
      that you believe is specific to the Hutchens case?
14
                 MR. SAMPSON: Object to form.
15
                 THE WITNESS: My testimony has been pretty
16
           general, you know. So it's hard to answer
           questions like that. It certainly backs up what
17
           my expert witness reports are about.
18
                 (By Mr. Marshall) And, Exhibit 3, when is
19
           Q.
20
      it that you first looked at that document?
                 This morning at about 5:30.
21
           Α.
                 And prior to this morning at 5:30 you had
22
23
      not looked at Exhibit 3?
24
           Α.
                 I had not.
25
           Ο.
                 Okay. And how is it that you came to be
```

aware of Exhibit 3?

- A. Well, when I was thinking about the testimony, I had had -- I think someone asked me a question about was there a list someplace of the known human teratogens. And I thought the people with this litigation -- everybody would know that and apparently people didn't know that. And this morning I thought about it and went looking for it and found it.
 - Q. Can I see --
- A. You may.
 - Q. So do you agree that all of the drugs that are listed here in Table 1.1 of Exhibit 3 are human teratogens?
 - A. This is Dr. Holmes's table. Okay?

 And my point out of this table is that the thalidomide and valproic acid and Accutane are three of the worst ones on that list.
 - Q. Okay. And show me how it is that you can determine by looking at Exhibit 3, just looking at Exhibit 3, that valproic acid, Accutane, and thalidomide are three of the worst teratogens.
 - A. Well, I do that from my experience and what I know about birth defects epidemiology and the causes of birth defects. But it's certainly on that

```
11
 1
      list, and it shows that it's a finite list.
               But my question is: Is there anything on
 2
 3
      Exhibit 3 that quantifies in any way the risk with
      the teratogens that are listed?
 4
               It doesn't do that, no.
                And my question is -- you've identified
 6
 7
      the drugs that are listed in Exhibit 3 as teratogens.
 8
                Do you see those?
 9
           Α.
                This table does that, yes, sir.
10
           Q.
                Yes, sir.
                 And do you agree with this table in
11
12
      Exhibit 3 that all of these drugs are, in fact,
13
      teratogens?
                 I have not reviewed all of those to make
14
15
      that determination.
          Q. So, for example, cyclosporin, what is
16
17
      that?
               It's an antiinfectious disease drug, I
18
           Α.
      believe. I don't know it in detail.
19
20
           Q.
               And is it a human teratogen?
21
           Α.
                I don't know the evidence on that.
                And lithium?
22
           Q.
23
           A.
                Lithium.
24
          Q.
               What is lithium?
          A. Lithium is a drug that's often used for
25
```

```
12
 1
      manic psychiatric disorders and it causes birth
      defect.
 2
 3
           Q.
              So lithium is a human teratogen?
                I believe that it is, yes.
 4
                 Okay. And what is the rate of major
 5
           Ο.
      congenital malformations with lithium?
 6
 7
                 It's hard to tell.
           Α.
 8
           Q.
              Can you --
                 It's done by -- I'm sorry. I didn't mean
 9
           Α.
10
      to interrupt.
           Ο.
11
                 That's okay.
12
           Α.
                 The evidence for lithium is pretty much
13
      related to the -- sort of the uniqueness of the birth
      defect, and it hasn't been studied as far as I know.
14
15
                 So can you give me a rate of major
           Ο.
      congenital malformations that is associated with
16
      lithium?
17
           Α.
                 I don't know that I can.
18
19
                 Can you say that the rate of major
20
      congenital malformations with lithium is more or less
      than 10 percent?
21
22
           Α.
                 I don't know that.
23
           Q.
                 How about in regard to warfarin? Warfarin
24
      is something that is given as a blood thinner?
25
           Α.
                 It is.
```

```
13
 1
           Ο.
                 Is warfarin a human teratogen?
                 It is.
 2
           Α.
 3
           Q.
                 And what is the rate of major congential
      malformations with warfarin?
 4
                 I don't know the answer to that.
 5
 6
                 Do you know whether the rate of major
 7
      congenital malformations with warfarin is more or
      less than 10 percent?
 8
           Α.
                 I don't know.
 9
10
           Ο.
                 Obesity, severe obesity, is that a human
      teratogen?
11
12
           Α.
                 I think that's questionable.
13
           Q.
                 Okay. Dr. Holmes lists severe obesity on
      his recognized human teratogens in Exhibit 3,
14
15
      correct?
16
           Α.
                 It's not a drug.
                 MR. SAMPSON: Is it under drugs?
17
                 THE WITNESS: No.
18
19
                 (By Mr. Marshall) I didn't say it was
           Q.
20
      under drugs.
21
                 Did I say it was under drugs?
22
           Α.
                 You did not.
23
                 Okay. Severe obesity, is that a
24
      recognized human teratogen?
25
           Α.
                 That's a lot debate about that.
```

```
15
 1
      important for your opinions in this case?
 2
                 MR. SAMPSON: Objection; form, asked and
 3
           answered.
 4
                 THE WITNESS: I'm sorry?
                 MR. SAMPSON: Go ahead.
 5
 6
                 THE WITNESS: Say again. What was your
 7
           question?
                 (By Mr. Marshall) Do you believe that
 8
           Q.
      Exhibit 3 is important for your opinions in this
 9
10
      case?
11
                 MR. SAMPSON: Same objection.
12
                 Go ahead.
13
                 THE WITNESS: I do.
               (By Mr. Marshall) Okay. What is
14
           Q.
      efavirenz? That's e-f-a-v-i-r-e-n-z.
15
                May I see it?
16
           Α.
           Q.
17
                Sure.
           Α.
                I don't know.
18
19
                Do you know what the rate of major
           Q.
20
      congenital malformations is with efavirenz?
                 I do not.
21
           Α.
22
                How about etretinate? Do you know what
23
      etretinate is?
24
           A. It's a variant of Accutane.
25
           O. So is it a variant of isotretinoin?
```

16 1 Α. Yes, in that family. 2 Ο. How about androgenic hormones? Do you 3 know what they're used for? Α. Yes. 4 What are they used for? 5 Ο. Well, they're used for -- to treat people 6 7 that need androgens, and they can cause masculinizing effects of fetuses. 8 What's a masculizing effect of fetus? 9 Ο. 10 Α. Making a girl fetus look like a boy, to have hair. I mean it just -- that's what masculine 11 12 things do. 13 Q. Oh, you're saying masculine? 14 Α. Yeah. 15 All right. How about paroxetine? What is Ο. that? 16 I don't know exactly what that is. 17 Α. Do you know what the rate of major 18 Ο. 19 congenital malformations is with paroxetine? 20 Α. I do not. 21 You also provided a book as part of your 22 production today, and it's called Dark Remedy: The 23 Impact of Thalidomide and its Revival as a Vital 24 Medicine, correct? 25 Α. Yes.

81 1 2 CERTIFICATE 3 4 STATE OF GEORGIA: COUNTY OF FULTON: 5 6 7 I hereby certify that the foregoing transcript was taken down, as stated in the 8 caption, and the questions and answers thereto 9 10 were reduced to typewriting under my direction; that the foregoing pages 1 through 80 represent 11 12 a true, complete, and correct transcript of the 13 evidence given upon said hearing, and I further certify that I am not of kin or counsel to the 14 15 parties in the case; am not in the regular employ of counsel for any of said parties; nor 16 am I in anywise interested in the result of said 17 18 case. 19 This, the 23rd day of March, 2016. 2.0 21 22 KARA BARGER, GA CCR-B-1496 23 24 25
